

# QUICK JACK

PATENT PENDING

## ADJUSTABLE PERIMETER SUPPORT

FOR USE IN SUPPORTING DOORWAYS AND WINDOWS FOR MANUFACTURED HOUSING  
AND PORTABLE BUILDINGS

### FEATURES

- Size is adjustable from 28" to 40" with threaded rod design
- Added base blocks allow additional height
- Adjustable system with nut is easy to use
- Light, compact design packaged in boxes of four
- Has capacity of up to 4,000 lbs.
- Base is offset from upper support

### BENEFITS

- Set up of perimeter piers takes only minutes. **SAVES TIME!**
- Can be used in a variety of set-up situations
- Homeowner can make adjustments on their own allowing ***fewer call backs and lower service costs!***
- Easier to transport and handle than concrete blocks
- Provides all the support needed for doorways and bay windows
- Allows easy fit with skirting, brick or block

*NOTE: Quick Jack is intended only to take the place of perimeter blocking underneath doorways and large windows. It is not intended to take the place of any primary home support or other pier support requiring a working load of more than 4,000 lbs. The Quick Jack is not warrantied for any purpose other than than perimeter support of doorways and windows for manufactured housing or portable structures.*
